

Boca Raton

Providing Access to Data Centers Serving Latin America

While Boca Raton, Florida, may be best known for its golf courses, stunning beaches and numerous parks, it boasts a thriving business community with more than 30 corporate headquarters, from innovative startups to large corporations. Boca Raton houses four data centers and plenty of colocation space to meet building, cooling, power, bandwidth and physical security needs. These colocation facilities are ideal for financial services companies, cloud and IT providers, network service providers, ISPs, content delivery networks and enterprises who want to connect to and serve Latin American markets.

Through a unique design-build opportunity, eX² Technology acquired a 1.9-mile route of single 1.25" HDPE SDR 13.5 conduit in Boca Raton that terminates near the Equinix M13 data center with dedicated precast concrete flush mounted manholes. The M13 data center offers the lowest latency access to Brazil and is an important location for subsea cable landings, including the Monet Submarine Cable System (Monet).

eX² is offering this conduit for lease with the ability to populate it with up to 1728-count fiber optic cable. For a detailed route map, rates, terms and conditions or to discuss connection opportunities, please contact us directly.

THE POSSIBILITIES ARE LIMITLESS

Wireless Backhaul / Fiber to the Tower

Small Cell / DAS / Wi-Fi

Digital Kiosks

Smart City / Smart Utilities
